

4. Find the slope of any line that is perpendicular to the line whose equation is $3x - 2y = 5$.

5. Write the equation of the line passing through $(-4, 2)$ and perpendicular to the line whose equation is $y = -\frac{1}{3}x + 7$. Express the equation in point-slope form.

Q: I can run but not walk. Wherever I go, thought follows close behind. What am I?
